

Start Activity will start the timer and allow the terms to be dragged.

Back to Selection will allow you to choose a new activity

The + and – buttons will increase or decrease the size of the image to improve visibility. **Reset** will reset the image to its original size. The **Esc** button will also reset the image

After **Start Activity** has been pressed, these terms can be dragged from the **Terms to Place** box, to the light blue drop zones.

When finished, press **Submit Score**. The Name/Team# of the user, the time submitted, score, and duration it took to complete the activity will be recorded.

Quick Tips

- The terms can only be dragged after hitting **Start Activity**
- Use the **zoom controls** and pan the image to adjust sizing
 - Do **not** increase or decrease the size of your browser (Ctrl + or -) after you have already started the activity. **Reset Activity** and then **Start** the activity again if you resized the browser window while an activity is active.
- After you have pressed **Zoom (+)** once or more, the image can be moved around for easier viewing. Pressing **esc** will reset the image size
- This application will only work on a desktop or laptop and is not mobile friendly
- Most, if not all, blue drop zones have the ability to accept multiple terms.
- If you have made a mistake, there is a small **x** in the top right-hand corner of any term that has been dropped into a drop zone to remove that term, and return it to the **Terms to Place** box.
- In PALS, each team will complete this activity on **one** laptop, but it is recommended that you bring more than team member brings a laptop in case of any technical issues.
